Professional Summary

Cybersecurity diploma student with hands-on experience in Linux, networking, Python automation, and security tools such as Nmap and Wireshark. Passionate about Blue Team operations and SOC environments, with a strong commitment to continuous self-learning and practical cybersecurity projects. Seeking a training opportunity to apply and further develop technical and analytical skills in a professional environment.

Technical Skills

- **Programming:** Python, Bash, SQL.
- **Linux:** Linux CLI, Permissions, Text Processing (Sed, Awk, Grep), File System Management, Command-line Automation.
- **Networking:** TCP/IP, DNS, HTTP, SSH, OSI Model, Fundamental Protocols.
- **Cybersecurity:** Nmap, Risk Management, Security Fundamentals, Digital Security.
- **Data Analysis:** Pandas, NumPy, Power BI, DAX.

Security & Technical Tools

- Kali Linux, Nmap, Wireshark, Burp Suite, Git, GitHub, VirtualBox.

Soft Skills

- Analytical Thinking
- Problem Solving
- Attention to Detail
- Continuous Learning
- Communication
- Team Collaboration
- Time Management
- Adaptability

- ## Certifications

Tuwaiq Academy (Star Platform)

- Linux Administration Path (Linux 101, Command Line, Bash Scripting, Permissions, Text Processing).
- Network Programming & Fundamental Protocols (101-102).
- Digital Security, Internet of Things (IoT) & Cyber Risk Management.
- Python Development (101-104) & Automation Scripts.
- SQL Essentials (101-103) & Relational Database Design.
- Power BI Fundamentals (101-103) & DAX Formulas.
- Introduction to Technical Projects, Methodologies & Frameworks.

Education

Diploma in Cybersecurity – Jazan Higher Training Institute | *Expected Graduation: 2026*

Relevant Coursework: Data Protection, Network Security, Operating Systems (Linux), Information Security Best Practices, and Python/Bash Scripting.

Projects

- ---

Bash Automation Toolkit | Bash, Linux CLI
Developed a modular Bash script to automate system administration tasks and user permission auditing.
- **Python Log Analyzer | Python**
Built a practical Python script to parse system and network logs, filtering for anomalies and potential security incidents.
- **Superstore Sales Analysis | Python, Pandas, SQL**
Analyzed 9,994+ programmatic transactions utilizing Python Pandas to identify core operational patterns.

Languages

- ---

English: Professional Proficiency (C1 Advanced - EF SET Certified).
- **Arabic:** Native Speaker.
